

What are the System Requirements for running AUser Manager?

Written by Administrator

Thursday, 20 August 2009 17:39 - Last revised Friday, 18 September 2009

System Requirements

- MySQL 4.x or later.
- PHP 4.3.x (PHP 5.2.x recommended)
- Browser: Firefox, IE 6/7, Opera.
- GD Library v2 (Optional but recommended)

Notes

- AUser Manager requires Mootools (shipped with Joomla). Third party extensions using JQuery can interfere with AUser Manager.
- You may need a HoneyPot Project API account for antispam features
- You may need a Botscout.com API account for antispam features
- Except of the required MySQL version all system requirements are similar the [ones of Joomla!](#)

Make sure you match them also!
